Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/3/04 has been entered.

Claim Objections

Claims 1, 3-5 and 8 are objected to because of the following informalities:

In claim 1, line 10, "the nip" should be --a nip--.

In claim 5, line 7, "integral load" should be --the load--.

In claim 5, line 10, "the reel drum." Should be --the reel drum, while swiveling the primary arm--.

Appropriate corrections are required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

Art Unit: 3654

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 3-5 and 8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 of U.S. Patent No. 6705561 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-7 of U.S. Patent No. 6705561 B2 disclose a reel drum defining a nip with a horizontal reel and able to control the nip force using a horizontally adjustable holding device; a plurality of swivelable levers; and a plurality of load sensing devices measuring the nip force without losses.

Response to Arguments

Applicant's arguments and amended claims filed on 6/3/04 have been fully considered and they are persuasive. The rejection set forth in the previous office action has been withdrawn.

Allowable Subject Matter

Claims 1, 3-5 and 8 would be allowable if rewritten or amended to overcome the objection(s) and double patenting, set forth in this Office action.
